

Captair Smart

Ductless filtering fume hoods

Erlab's unique Flex Filtration can manage most lab applications

Sensors to detect filter saturation

Face velocity is automatically monitored

The 6° slanted sash offers optimal visibility and an ergonomic work space

Large openings for easy access to your work

SMART TECHNOLOGY

Simple, intuitive communication by light shows the status of the hood

Low power consumption. Operates with a standard plug using only 65W

Download the eGuard App for remote control and monitoring

Life in the laboratory becomes simpler and safer

Erlab's 50 years of expertise in research, design and manufacturing of filtering fume hoods guarantee superior filtration that will keep you protected during your chemical processes.

Smart Technology: The new Captair Smart ductless filtering fume hoods are designed with a simple and innovative way of communication. Smart Technology uses simple light to show that the hood is operating safely so you can focus your attention on what is most important: your work.

50 years of Erlab's expertise in chemicals filtration

Easy safety communication through light and beeps

Remote access to hood status and alerts

Full compliance with the international safety standards

High level of after-sale service

Simpler to use

- Smart Technology enables visual light communication to indicate the status of the hood. When the light is still the hood is operating safely. To alert you, the light will pulse. A simple light pattern will indicate if :

Air flow is compromised

Fan Failure

Filter breakthrough

- The **eGuard App** gives you remote control to monitor the hood, change the settings, and delivers safety alerts immediately to your mobile, tablet or PC device.

Safer to operate

- The configurable filtering system above the enclosure can be adapted to filter gases, solvents, powders and particulates keeping the user and the lab protected by safely and efficiently recirculating air within the room and releasing purified air back into the room free of any toxic hazardous vapors or odors
- Meets AFNOR NFX 15 211/SEFA 9 filtration efficiency standard (classes 1 and 2).
- New sensors are added for detection of solvents or acids or formaldehyde.
- New electronic anemometer monitors face velocity
- ESP Program: Usage certification delivered with each unit after approval of your handlings or process by our in-house lab.
